

# Carriage House Six-Five-Five

Turn that corner in the backyard into something useful with a carriage house for a relative, friend or even tenant. Just the right amount of space for someone living alone with privacy, patio & deck, modern kitchen, w/d, parking and more.

Exterior can be styled to match primary house on lot or this model can be built on its own small lot.

Think about it! How much space does one really need?

If you are a builder consider putting a bunch of these homes on a small lot in town for a better ROI.
